# RMS-Kiosk™ Self Order for Busy Convenience Stores

RMS-Kiosk is a multi media **multi department** touchscreen customer activated **ordering system** designed for busy convenience stores. RMS-Kiosk allows customers to order "Made To Order" sandwiches and deli items such as cheese and cold cuts. RMS-Kiosk runs on the **NCR EasyPoint 42 Kiosk**.

## How does it work?

Customers walk up to the RMS-Kiosk system, place their order, pay at the cashier then pick up their order when they have finished shopping. They save time waiting in line. With a POS interface, **cashiers can scan a bar code printed on the kiosk receipt to recall the kiosk order on the POS** saving time to re-enter the customer order. RMS-Kiosk doesn't forget to charge for the "extras".

## RMS-Kiosk Features include:

- » Suggestive Selling
- » Out Of Stock and On Sale Item Flags
- » Preparation Time Estimates
- » Powerful Coupon Generation
- » High Level of Customization
- » Latest Technology: ASP.NET - CE.NET
- » POS System Interface Option
- » Seamless Scale Management Interface
- » RMS-Remote Online Ordering

*NCR EasyPoint 42 Kiosk*

## Benefits:

- » Customer Convenience
- » Cross Advertising
- » Increases Average Sale
- » Increases Brand Recognition

**RMS-Kiosk has a very high ROI and a low implementation cost.**

**It increases sales and customer satisfaction and reduces labor costs**
