RMS-Kiosk™ Self Order for Busy University Cafeterias

RMS-Kiosk is a **web based** multi media **multi department** touchscreen customer activated **ordering system** designed for cafeterias, especially for university cafeterias. RMS-Kiosk allows students or customers to order breakfast or lunch items, including "Made To Order" sandwiches, using **NCR EasyPoint 42 Kiosks.**

How does it work?

Students walk up to the RMS-Kiosk system, place their orders, pick up their orders at the cafeteria pickup counter, and proceed to the cashier stations.

POS Interface Option

The **Cashiers recall kiosk transactions** by **scanning** the kiosk receipt or by identifying the student/customer order on the RMS-TOUCH POS system's "Order Review" screen.

The RMS-TOUCH POS also includes a "**declining balance**" function, so students can charge their meals to their accounts by **swiping their ID cards** through the POS magnetic card reader.

The POS interface saves cashiers time in entering student orders and at the same time, charges for all the "extras" included on the sandwiches!

NCR RealPOS 70 POS Terminals

RMS-Kiosk Features

‣ Suggestive Selling
‣ Preparation Time Estimates
‣ High Level of Customization
‣ Latest Technology: ASP.NET - CE.NET
‣ **RMS-Remote - Online Ordering**

Benefits:

‣ Customer Convenience
‣ Increases Average Sale
‣ Increases Number of Transactions
