

## RMS-32 Restaurant POS Software Bars - Restaurants - Cafeterias

Maximize your profitability, time and customer satisfaction. RMS-32 Point Of Sale (POS) software is the most innovative in the industry, offering unique features not found in competitive products.

RMS-32 POS is state of the art and very easy to learn and use. RMS-32 POS will improve your efficiency and profitability by reducing errors, maximizing your sales, reducing time to present the check to the customer and improving overall satisfaction.

RMS-Touch is a clear choice with years of experience as a leader in Restaurant Touch Screen POS, with thousands of satisfied restaurant users around the world.

### RMS-32 goes far beyond traditional restaurant POS systems

RMS-TOUCH POS software has been installed in the most prestigious restaurants in the country. Our **3 dimensional graphical table management** feature with our unique **ZOOM** feature will significantly increase revenues and profits for your restaurant. You will sell more, reduce waiting times by increasing table usage and overall table turnover each and every night. As an example, just 5 more tables each weekend night can add \$50,000 per year.

In **Hotels**, RMS-32 interfaces with the major Property Management Systems.

For **Take Out** and **Delivery Operations**, RMS-32 features include **caller-id interface**, recall customer last order, dispatch screen and a powerful back office reporting.

RMS-TOUCH has been installed in quick service restaurants (QSR), casinos, country clubs, coffee shops, cafeterias, food courts, schools, hospitals and theme parks.

RMS-32 runs on Windows 2000 or XP professional (256MB. 1Ghz min).

Kiosk / POS integration
